Medications Add Years to Life, Rehabilitation Adds Life to Years!	13 15h – 14 15h	Disability Networking Zone Global Village, Booth 510
Stay savvy, stay sexy: Discussing sex-positive education tools for older adults (The SHAPES Project)	15 00h – 16 00h	Positive Action PLHIV Networking Zone Global Village, Booth 501
An Evolving Epidemic: Driving Science to Meet Patients Needs	18 30h - 20 30h	Auditorium

Wednesday July 25th 2018		
Canadian Responses to HIV and Aging	10 30h – 11 30h	Canada Pavilion Exhibition Hall, 107
Coming of age with HIV: A testimony of our success and a measure of our readiness for the future	11 00h – 12 30h	Elicium 2
<ul style="list-style-type: none"> Living with HIV, on treatment for life, and growing older: the impact on the body and mind 	11 23h – 11 35h	
<ul style="list-style-type: none"> Caring for Older People with HIV: Challenges and Best Practices 	11 36h – 11 48h	
Home-based testing identifies more previously undiagnosed older men than mobile testing in Botswana	11 45h - 12 00h	Hall 11A

Finessed: Fostering Inclusion for Students with Episodic Disabilities in Canada	11 45h – 12 45h	Disability Networking Zone Global Village, Booth 510
Ageing Well with HIV: What can you do as PLHIV?	12 00h – 13 30h	Amsterdam Theatre Global Village
Healthy aging for people living with HIV: Achieving the 4th 90	18 30h – 20 30h	Emerald Room

Thursday July 26th 2018		
Positive Health: Towards Empowering Older Persons Living with HIV	13 00h – 14 30h	Positivelydutch.nl Networking Zone Global Village, Booth 504

Poster Presentations

Title	Number	Track
Does HIV-seroconversion affect the serum N-glycans profile, one possible biomarker of ageing? Insights from a longitudinal study	THPDA0103	A - Basic and translational research
The effect of alcohol consumption on specific neuropsychological testing domains in patients enrolled in the Neurocognitive Assessment in the Metabolic and Aging COhort study (NAMACO)	TUPEB071	B - Clinical research
Higher prevalence of neurocognitive impairment among aging HIV-infected women despite lower comorbidities than men	TUPEB072	B - Clinical research
Higher prevalence of depression among aging HIV-positive compared to HIV-negative individuals	TUPEB076	B - Clinical research
Triglycerides/glucose index is a simple and clinically useful surrogate for insulin resistance among non-diabetic HIV-infected Aging in Asia	TUPEB116	B - Clinical research
Higher prevalence of insulin resistance among non diabetes HIV-infected ageing Asian received long term ART compared to HIV uninfected control	TUPEB119	B - Clinical research
Immunosuppression and HIV viremia associated with increased atherogenic cholesterol concentrations in older people with HIV	TUPEB125	B - Clinical research
Comparison of physical health conditions among older adults living with HIV and age-gender matched non-HIV older adults: Chiang	TUPEB135	B - Clinical research

Mai, Northern Thailand		
Patterns of antiretroviral drugs use and co-morbid conditions in a cohort of older women living with HIV in Argentina	WEPEB111	B - Clinical research
Elderly patients on antiretroviral therapy with dolutegravir are at increased risk for ALT elevation	TUPEB131	B - Clinical research
Frailty is associated with HIV and female gender in Asians over 50	TUPEB134	B - Clinical research
Beyond the 60s: changing co-morbidities in people living with HIV aged over 60 attending clinic in 2010 and 2017	TUPEB136	B - Clinical research
Immediate vs. deferred switching from a boosted Protease Inhibitor (PI/r) to Dolutegravir (DTG) suppressed patients with high cardiovascular risk or age ≥ 50 years: final 96 weeks results of NEAT 022	THPEB053	B - Clinical research
PrEP uptake among middle age and older individuals in rural Kenya	WEPEC244	C – Epidemiology and Prevention Research
Comparing behavioural and health seeking outcomes among young and older female sex workers using the polling booth survey 2017, Kenya	WEPEC282	C – Epidemiology and Prevention Research
Characterizing resilience and viral load among midlife and older gay, bisexual, and other men who have sex with men	TUPEC175	C – Epidemiology and Prevention Research
Perceived undertreated pain is associated with overdose among older HIV-positive people who inject drugs in Vancouver, Canada	TUPEC233	C – Epidemiology and Prevention Research
Frailty-related phenotype, quality of life and non-communicable disease in older Ugandan adults - associations with toxic stress and HIV infection	TUPEC282	C – Epidemiology and Prevention Research
Newly increasing HIV incidence among adults aged 50 years or older in Ukraine	THPEC203	C – Epidemiology and Prevention Research
Uncovering a new at-risk group for HIV infection in Ukraine among adults aged 50 and older	TUPEC220	C – Epidemiology and Prevention Research
Differential trends in biomedical HIV prevention among younger and older men who have sex with men in a treatment as prevention environment: a 5-year prospective cohort study	THPEC279	C – Epidemiology and Prevention Research
HIV treatment and prevention needs assessment: comparison between younger and older men who have sex with men in Nigeria	TUPEC180	C – Epidemiology and Prevention Research

Women ageing with HIV: “I was not meant to be here, and I’m still here.” How women have adapted to living long-term with HIV	TUPED438	D - Social and political research, law, policy and human rights
HIV: once a crisis, now undetectable? An ethnographic study of ageing gay men’s long-term experience of HIV	TUPE	D - Social and political research, law, policy and human rights
Characterizing experiences of conversion therapy among midlife and older MSM from the Multicenter AIDS Cohort Study (MACS)	TUPED526	D - Social and political research, law, policy and human rights
Sexual behaviors among older adults living with HIV in Chiang Mai, Northern Thailand	TUPED436	D - Social and political research, law, policy and human rights
